- Captures Data & Analytics

PRSONAS creates an automated visitor management solution that allows organisations to engage with their visitors by screening, directing, informing, and announcing them without losing the human touch. The digital assistant is great for visitor management and wayfinding services.

The virtual assistant will provide your guests with an enhanced experience level as well as offering a complete concierge-style service to deliver real user value. The assistants are easy to customise to different use cases and can be fully branded to welcome your customers with concise and clear communication in almost any language.

Penta can deliver the PRSONAS Virtual Assistant as a fully maintained solution.

intelligent digital assistants

Organisations across the world are realising the value of virtual assistants
